

Marketing Strategy Document: Bloom Dental Studio

1. Executive Summary

Bloom Dental Studio is a cosmetic and general dentistry clinic in Bonifacio Global City serving busy professionals in the BGC and Makati corridor. The clinic already receives some inbound interest, but its follow-up, booking, reminders, and post-consultation conversion process are too manual.

The primary campaign opportunity is to use GoHighLevel to turn interested prospects into booked consultations, reduce missed appointments, and create a structured path from consultation completion to Premium In-Chair Whitening revenue.

Primary campaign goal:

Book 60 confirmed free new-patient consultations within 60 days.

Supporting goals:

- Reduce no-show rate from 35% to below 15%.
- Convert 40% of completed consultations into Premium In-Chair Whitening bookings.
- Build a repeatable GHL system for lead capture, appointment booking, reminders, no-show recovery, and post-consultation upsell.

2. Business Overview

Business:

Bloom Dental Studio

Location:

Bonifacio Global City, Metro Manila

Services:

- General dentistry
- Cosmetic dentistry
- Teeth whitening
- Veneers
- Invisalign
- Six-month cleaning and check-up

Entry offer:

Free 30-minute new-patient consultation.

Main upsell:

Premium In-Chair Whitening at PHP 15,000 per session.

Retention offer:

Six-month cleaning and check-up at PHP 3,500 per visit.

3. Target Audience

The primary audience is appearance-conscious professionals aged roughly 28-45 who work in BGC, Makati, finance, tech, corporate, and similar fields.

They are:

- Busy and time-poor
- Comfortable investing in appearance
- Interested in a better smile
- Cautious about price uncertainty
- Sensitive to hard-selling
- Likely to check reviews and proof before booking

Their main hesitation is not only money. It is also trust, time, and fear of pressure.

4. Current State

Current lead flow:

- Around 20 website leads per month
- Around 6 become booked appointments
- Approximate lead-to-booking rate: 30%
- No-show rate: 35%

Current problems:

- Follow-up is handled manually by the front desk.
- Leads can sit for one or two days before response.
- Appointment reminders are inconsistent.
- No-show recovery is not systemized.
- Post-consultation whitening follow-up is informal.
- Six-month recall is manual.

5. Strategic Diagnosis

Bloom Dental does not mainly have an awareness problem. It has a conversion and follow-up problem.

The system should therefore focus on:

- Faster speed-to-lead
- Easier booking
- Stronger appointment reminders
- Automated no-show recovery
- Post-consultation whitening follow-up
- Longer-term recall automation

6. Recommended Funnel Strategy

Use a dedicated GHL landing page connected to a GHL form and booking calendar.

The front-end offer should be the free 30-minute consultation, not whitening.

Why:

- The consultation is lower friction for cold traffic.
- It builds trust before the PHP 15,000 whitening offer.
- It gives the clinic a chance to recommend treatment based on patient goals.
- It creates a measurable conversion event in GHL.

7. Customer Journey

1. Prospect sees Meta ad.
2. Prospect visits GHL landing page.
3. Prospect submits New Patient Inquiry form.
4. Prospect books free consultation.
5. GHL sends confirmation and reminders.
6. Patient attends consultation.
7. GHL sends whitening follow-up.
8. Patient books whitening or enters future nurture.
9. Patient receives six-month recall reminder later.

8. Positioning

Core message:

Get clear, pressure-free guidance on your smile options in one free 30-minute consultation.

Supporting angles:

- Transparent next steps
- No hard sell
- Easy online booking
- Designed for busy BGC/Makati professionals
- Professional whitening available after consultation

9. KPIs

North Star metric:

Cost per booked consultation.

Primary KPIs:

- Landing page conversion rate
- Lead-to-booking rate
- Booked consultations
- No-show rate
- Consultation completion rate
- Whitening attach rate
- Whitening revenue

Targets:

- 60 booked consultations in 60 days
- No-show rate below 15%
- 40% whitening attach rate from completed consultations
