

Analytics, KPI Framework, and Optimization Plan: Bloom Dental Studio

1. North Star Metric

Cost per booked consultation.

Formula:

Total ad spend / booked consultations

Why it matters:

The campaign is designed to create qualified appointments. Whitening revenue depends on booked and completed consultations.

2. KPI Targets

Booked consultations:

60 in 60 days

No-show rate:

Reduce from 35% to below 15%

Whitening attach rate:

40% of completed consultations

- Notes / action items

5. Weekly Optimization Logic

If clicks are low:

Improve ad hook, creative, and audience.

If landing page conversion is low:

Improve headline, proof, pricing clarity, CTA, and form length.

If lead-to-booking rate is low:

Improve form-to-calendar handoff and booking follow-up.

If no-show rate is high:

Improve reminder timing, SMS delivery, address clarity, and reschedule links.

If whitening attach rate is low:

Improve post-consultation offer, in-person handoff, price clarity, and follow-up timing.
